The DERM 942 and its patent pending handpiece are designed and engineered to be the most reliable and durable desiccator available today. The unit’s life is prolonged by incorporating the latest in chip technology and reducing the number of internal parts, thereby generating less internal heat.

40 watt high frequency desiccator

Adjustable in 1/10th watt increments in the first 10 watts, in monopolar and bipolar

More accurate power with Universal Power Control 100-240 VAC

Less to do and less to buy makes this the most cost effective and user friendly unit on the market

The Bovie DERM 942 is a ground reference unit which means no grounding pad is required.
