The Bovie 3350-V offers 300 watts of power to facilitate large animal surgical procedures. This innovative energy-based device offers 13 modes of surgical energy delivery. The Bovie 3350-V is engineered to meet operating room demands with safety, reliability and precision.

- This unit is intended for cutting, coagulation, and ablation of a variety of tissues.
- Bovie FDFS™ technology measures tissue impedance 5,000,000 times a second and adjusts output 5,000 times a second for consistent energy delivery in a variety of tissues.
- 10 presets for quick and easy setup, and an additional 6 bipolar presets.
- Tissue sensing AutoBipolar feature automatically activates and delivers bipolar energy without the use a footswitch.
- Unique to the Bovie 3350-V is the Bovie Bipolar (BBP) mode with pulsing bipolar for tissue fusion and aggressive bleeding control.
- The Bovie 3350-V makes switching from Cut to Coag as easy as pushing the button on the ESPR2 reusable electrosurgery pencil.
- The Gentle Coagulation mode provides a safer, more gentle alternative for effective treatment of delicate and sensitive tissues.

**Recommended Accessories:**

- BV-1253B Monopolar Footswitch
- BV-1254B Bipolar Footswitch
- A1255A Footswitch Adapter
- A827V Bipolar Forceps Cable
- A821 Reusable Bipolar Forceps
- SCH10 Suction Coagulator

**Standard Equipment:**

- (1) Bovie 3350-V Electrosurgical Generator
- (1) ESPR2 Sterile Reusable Pencil
- (1) A1204P Reusable Stainless Steel Grounding Plate
- (2) A1254C Reusable Grounding Cord
- (1) 120 VAC, 240 VAC Hospital-Grade Power Cord
- (1) MC-55-232-001 User’s Guide

**Recommended Accessories:**

- BV-1253B Monopolar Footswitch
- BV-1254B Bipolar Footswitch
- A1255A Footswitch Adapter
- A827V Bipolar Forceps Cable
- A821 Reusable Bipolar Forceps
- SCH10 Suction Coagulator

---

**EQUIPMENT INCLUDED**

- A1254C
- A1204P
- ESPR2

**RECOMMENDED ACCESSORIES**

- BV-1253B
- BV-1254B
- A1255A
- A827V
- A821
- SCH10
